Discovery Metals Corp.
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
Unaudited - (Expressed in Canadian dollars, except where otherwise noted)
For the Three and Six Months Ended June 30, 2020 and 2019

1. DESCRIPTION OF BUSINESS AND NATURE OF OPERATIONS

Discovery Metals Corp. (“Discovery Metals” or the “Company”) is a mineral exploration company whose main objective is to identify and successfully define and develop mineral deposits, primarily in Mexico.

The Company was incorporated on October 10, 1986 under the laws of British Columbia as Ayubowan Capital Ltd. On June 13, 2017, the Company’s name was changed to Discovery Metals Corp. The Company is listed on the TSX Venture Exchange (the “Exchange” or “TSXV”) under the symbol “DSV”. The Company's head office is located at Suite 701 - 55 University Avenue, Toronto, Ontario, M5J 2H7.

The Company’s Board of Directors authorized the issuance of these unaudited condensed interim consolidated financial statements (the “interim financial statements”) on August 26, 2020.

2. BASIS OF PREPARATION

These interim financial statements for the three and six months ended June 30, 2020 and 2019, have been prepared in accordance with International Accounting Standard 34 – Interim Financial Reporting using accounting policies consistent with International Financial Reporting Standards as issued by the International Accounting Standards Board (“IFRS”). As such, certain disclosures required by IFRS have been condensed or omitted. These interim financial statements should be read in conjunction with the Company’s audited consolidated financial statements and the notes thereto as at and for the years ended December 31, 2019 and 2018 (the “consolidated financial statements”). The Company’s interim results are not necessarily indicative of its results for a full year.

These interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at June 30, 2020, the Company had working capital (defined as current assets less current liabilities) of \$42,167,158 (December 31, 2019 – \$23,860,648), shareholders’ equity of \$69,772,506 (December 31, 2019 – \$52,714,132) and an accumulated deficit of \$44,859,683 (December 31, 2019 – \$38,285,870).

The Company has not yet determined whether the properties on which it has options contain mineral reserves that are economically recoverable. The continued operations of the Company are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of such properties and upon future profitable production or proceeds from the disposition of the properties.

3. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies adopted by the Company in the preparation of its interim financial statements are set out below.

a) Basis of Measurement

The interim financial statements have been prepared using the same accounting policies and methods of application as those disclosed in note 3 to the Company’s consolidated financial statements except those disclosed in Note 4 below.

Discovery Metals Corp.
NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
 Unaudited - (Expressed in Canadian dollars, except where otherwise noted)
 For the Three and Six Months Ended June 30, 2020 and 2019

b) Basis of Consolidation

These interim financial statements are presented in Canadian dollars (“CAD”) unless otherwise noted. The interim financial statements include the accounts of the Company and its wholly owned subsidiaries.

Subsidiaries are entities over which the Company has the power to, directly or indirectly, govern the financial and operating policies of the entity to obtain benefits from its activities. In assessing whether control exists, potential voting rights that are presently exercisable or convertible, are taken into consideration. Subsidiaries are fully consolidated from the date on which control is transferred to the Company. They are deconsolidated from the date on which control ceases.

The Company’s principal subsidiaries and their geographic locations at June 30, 2020 were as follows:

Direct Parent Company	Location	Ownership Percentage	Properties
Discovery México S.A. de C.V.	Mexico	100%	Puerto Rico, La Kika, Minerva, Monclova, Jemi Rare, Renata, Santa Rosa
Minera Titán S.A. de C.V.	Mexico	100%	Cordero

All intercompany assets, liabilities, equity, income, expenses and cash flows arising from intercompany transactions have been eliminated on consolidation.

c) Currency of Presentation

The interim financial statements are presented in Canadian dollars (“CAD”) which is the functional and presentation currency of the Company. The functional currency for the entities through which the Company conducts its operations is determined depending upon the primary economic environment in which they operate. The functional currency of the Mexican subsidiaries is Mexican pesos (“MXP”).

d) Foreign currency translation

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. At the end of each reporting period, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in foreign currencies are not re-translated. Total foreign exchange gains and losses are recognized in the income statement and the unrealized portion is reported separately in the consolidated statement of cash flows. The foreign exchange differences arising from the translation of the subsidiary with functional currency different than the consolidated functional currency are recognized as currency translation adjustments in other comprehensive loss in the consolidated statement of loss and total comprehensive loss.

4. CHANGES IN ACCOUNTING POLICIES

a) Application of new or amended standards effective January 1, 2020

There were no new or amended standards effective January 1, 2020.

5. CRITICAL JUDGMENTS AND ESTIMATES IN APPLYING ACCOUNTING POLICIES

The preparation of interim financial statements in conformity with IFRS requires management to make judgments and estimates that affect the application of accounting policies and the reported amounts of assets, liabilities, contingent liabilities, income and expenses. Actual results could differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and applied prospectively.

Information about critical judgments and estimates in applying accounting policies that have the most significant effect on the amounts recognized in the interim financial statements for the three and six months ended June 30, 2020 are consistent with those applied and disclosed in note 5 of the consolidated financial statements. The Company's interim results are not necessarily indicative of its results for a full year.

COVID-19 Update

On March 31, 2020, the Company announced that it would temporarily suspend all exploration activities in Mexico as a result of an emergency decree issued by the Mexican Ministry of Health stating that all non-essential services be stopped until May 31, 2020. On May 13, 2020, the Government published another decree announcing that mining and several other sectors were to be considered essential services and could begin operations as early as June 1, 2020. Commencement of operations would be subject to government approval of a company's application to resume operations. The applicant must demonstrate that strict health and safety protocols are in place and will be adhered to. The Company applied and was granted permission to restart operations.

The Company remains committed to being engaged with our local stakeholders during this uncertain period and will continue to closely monitor the directives of all levels of government in both Mexico and Canada as well as the relevant health authorities.

 For the Three and Six Months Ended June 30, 2020 and 2019

a) Short-term investments

The Company invested \$15,000,000 of excess cash from the non-brokered private placement (note 13b) in a two-year fixed rate GIC, bearing interest at 1.55% per annum. This investment has been classified as current as there are no restrictions on redemption and the Company may, at its discretion, withdraw any amount to fund current operations.

7. SALES TAX AND OTHER RECEIVABLES

	June 30, 2020	December 31, 2019
Sales tax receivable	\$ 1,899,917	\$ 1,454,986
Accumulated impairment of sales tax receivable	(1,767,702)	(1,409,637)
Other receivables	8,799	13,925
	\$ 141,014	\$ 59,274

At June 30, 2020, the Company had an aggregate Mexican value added tax (“IVA”) recoverable balance of \$3,213,870 including \$1,446,167 remaining from the IVA acquired in the Levon transaction (December 31, 2019: \$3,197,997 including \$1,743,011 acquired in the Levon transaction).

The Company does not have a history of collection of Mexican IVA recoverable amounts due to the recent commencement of operations in Mexico. In addition, there is a high degree of uncertainty regarding the timing of repayment of IVA amounts by the Mexican government. As a result, on acquisition of Levon, no value was allocated to the IVA receivable balance. At June 30, 2020, the Company has established a provision in full for the IVA receivable balance of \$1,767,702 accumulated since acquisition.

On February 21, 2020, the Company received a partial IVA refund in the amount of 4,402,046MXP or \$296,830. The Company also received interest on this balance in the amount of 998,384MXP or \$67,321. The partial refund and interest received are recognized in ‘other income’ and ‘interest income’, respectively, in the interim consolidated Statement of Loss and Total Comprehensive Loss for the three and six months ended June 30, 2020.

Subsequent to June 30, 2020, on August 5, 2020, the Company received another partial IVA refund in the amount of 1,609,384MXP or \$95,211. The Company also received interest on this balance in the amount of 503,737MXP or \$29,801. The partial refund and interest received is expected to be recognized in ‘other income’ and ‘interest income’, respectively in the interim consolidated Statement of Loss and Total Comprehensive Loss for the three and nine months ended September 30, 2020.

The Company expects to continue to recognize a provision for 100% of the IVA recoverable balance until such time as there are sufficient indicators of recoverability.

19. CAPITAL MANAGEMENT

The Company defines capital as its shareholder's equity (comprised of issued share capital, contributed surplus and deficit). The Company's objectives when managing capital are to support the Company's main activities of identifying, defining and developing mineral deposits, thus creating shareholder value, as well ensuring that the Company will be able to meet its financial obligations as they become due.

The Company manages its capital structure to maximize its financial flexibility to enable the Company to respond to changes in economic conditions and the risk characteristics of the underlying assets and business opportunities. The Company does not presently utilize any quantitative measures to monitor its capital, but rather relies on the expertise of the Company's management to sustain the future development of the business. Management reviews its capital management approach on an ongoing

basis and believes that this approach, given the relative size of the Company, is reasonable. The current excess funds realized from the non-brokered private placements are invested in highly liquid, interest-bearing marketable securities with no restrictions on redemption.

As at June 30, 2020, aside from the long-term portion of the lease liability (note 12), the Company does not have any long-term debt outstanding and is not subject to any externally imposed capital requirements or debt covenants. There was no change to the Company's approach to capital management during the three and six months ended June 30, 2020.

20. FINANCIAL INSTRUMENTS

The Company's financial instruments consist of cash and cash equivalents, other receivable and deposits, investments in marketable securities, accounts payable and accrued liabilities and lease liabilities.

Cash and cash equivalents, accounts receivable and deposits are classified as receivables and are measured at amortized cost using the effective interest method. Investments are classified as receivables and are measured at fair value through profit and loss. Accounts payable and accrued liabilities are classified as other financial liabilities and are measured at amortized cost. These financial instruments approximate their fair value due to their short-term nature.

The fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Financial instruments are classified into one of three levels in the fair value hierarchy according to the degree to which the inputs used in the fair value measurement are observable.

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2: Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
- Level 3: Inputs that are not based on observable market data.

As at June 30, 2020 the Company had no financial instruments classified as Level 2 or 3.

liabilities of \$520,234 (December 31, 2019 – \$716,596). The Company’s financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

As at June 30, 2020, the Company has no sources of revenue to fund its operating expenditures. Since inception the Company has relied solely on private placements to fund its operations. Since the change of business transaction in August 2017, such private placements include gross proceeds of \$68,623,270 received through multiple non-brokered private placements (note 13b), or \$103,624,720 including the \$35,001,450 non-brokered private placement that closed on August 7, 2020 (note 25).

Management believes these financings will fund the Company’s initial exploration work on the properties in both Coahuila and Chihuahua, Mexico as well as the existing administrative needs. The Company may require additional financing to accomplish long-term strategic objectives. Future funding may be obtained by means of issuing share capital, or debt financing. At June 30, 2020, the Company is currently exposed to a low level of liquidity risk.

b) Credit risk

Credit risk is the risk that one party to a financial instrument will fail to fulfill an obligation and cause the other party to incur a financial loss. The Company’s cash and cash equivalents, accounts receivable and prepaids and deposits are exposed to credit risk. The Company has assessed the credit risk on its cash and cash equivalents as low as its funds are held in highly rated Canadian financial institutions. Management deems the credit risk associated with other receivables and deposits to be at an acceptable level.

The Company’s maximum exposure to credit risk related to certain financial instruments as identified below, approximates the carrying value of these assets on the Company’s consolidated statements of financial position.

	June 30, 2020	December 31, 2019
Cash and cash equivalents	\$ 26,913,163	\$ 23,950,737

interest-bearing short-term investments. The Company regularly monitors its cash management policy. Management has determined interest rate risk to be low.

ii. Foreign currency risk

The Company's functional currency is the Canadian dollar. At June 30, 2020, cash balances were held primarily in Canadian dollars. Foreign currency risk is the risk that the value of the Company's financial instruments denominated in foreign currencies will fluctuate due to changes in foreign exchange rates. Changes in the exchange rate between foreign currencies and the Canadian Dollar could have a significant impact on the Company's financial position, results of operations, and cash flows. The Company does not use derivative instruments to reduce its exposure to foreign currency risk.

Mexican Peso	54,144	157,598
	\$ 220,907	\$ 211,731

It is estimated that a 10% fluctuation in the United States Dollar and Mexican Pesos against the Canadian dollar would affect net loss at June 30, 2020 by approximately \$21,933 (December 31, 2019: \$20,782).

As at June 30, 2020, Management has determined the Company's exposure to foreign currency risk to be at an acceptable level.

iii. Price risk

The Company closely monitors commodity prices, particularly as they relate to base and precious metals, and movement in the price of individual equity securities movements and the stock market generally, to determine the appropriate course of action to be taken by the Company.

There have been significant fluctuations in commodity prices and prices of equity securities during Q2 2020 as a result of the COVID-19 pandemic. Due to this volatility, the Company determined it was exposed to a higher level of overall price risk when compared to the risk assessed at December 31, 2019.
